Notes			
This release is scheduled for Production on August 27, 2005.			
Brief Description Of Resolution			
Work Requests			
System Maintenance Change Requests (SMCRs)			Notes

IR	Description	Special Instructions
6505	In CMS Net WEB-Provider, the order in which the Special Care Center Members appear is incorrect. 1. The SCC bulletins are not displaying the Medical director first. The Medical Director should always be listed first within each grouping (i.e. Physicians, Associates etc). Typically, there is only one medical director for each SCC. 2. The SCC bulletins are displaying the team members in alpha order, regardless of their specialty. All team members practicing the same specialty need to be grouped together instead of listing them alphabetically (i.e. anesthesiologists, pediatricians)	
316	Modify the Service Begin Date, End Date and Request Date so that dates can be entered in the fields manually or by selecting from a calendar drop down (rather than a drop down list only).	Reports
330	Modify CMS Net Dental PMF file layout to accept dental service office information from Delta Dental. This will include the addition of a 2 digit service office indicator. The final location of the new field is to be determined at a later date. This must be implemented concurrently with MCD 336 at Delta Dental. Please see Traci for an implementation date. This will not impact the SAF layout, only the 5 digits of the Dental Provider ID shall continue be sent on the SAF.	Add the following fields to the tables: SAR: ProvLocCd Address: Loc_Cd
345	Attempting to establish a new SCC (7.20c.9). Click on Provider Team, enter provider Medi-Cal ID, select provider. Click on the TEAM ; the system does not present any selection for team. ***** TEAM is a required field for Provider Team..	
354	Sequence of numbers assigned to new SCCs are incorrect. System assigns new SCC number based on Center Type. Examples: Metabolic center should have the format of 7.09.09a instead the system is assigning 7.09a.9 Endocrine center format should be 7.09.09b instead of 7.09a.9 All other center 7.02.xx instead the system is assigning 7.02.x	
342	Add new Service Code Grouping (SCG) 09 titled "Chronic Dialysis Clinic" to CMS Net. Allow SCG 09 to be authorized to provider types 42 (Chronic Dialysis Clinics), 15 (Community Hospital Outpatient), 61 (County Hospital Outpatient) and Special Care Centers (SCC). Allow SCG 01 to be authorized to provider type 42	Check the addendum for the queries that need to be executed
347	Previously, when searching for a client in the SAR system in the Search Service Authorizations screen using the CIN, the check digit was not required. A change that was implemented on 6/25/05 now requires a check digit to be entered. Change the search screen back to how it was prior to the implemented change.	Changes done only on the backend.
IR 378	Due to discrepancies between the CMS Net and EDS "Drugs that Require Specific Authorization" file, EDS will transmit a complete replacement file to CMS. Need to coordinate receipt and processing of this file for CMS Net.	

IR	Description		Special Instructions
Software Components		Notes	
CMSE47_08272005_RELEASE21_DYNAMIC.war		War file consists of JSP's, Servlets, Java Classes and Dependency files to be installed on Websphere Application Server	
CMSE47_08272005_STATIC.zip		Zip file consists of static content (Images, StyleSheets, Help HTML Pages).	
S. No	Special Instructions: Web		

IR	Description	Special Instructions
1	<p>Note: This Document assumes an understanding of deploying war files in a Websphere Clustered Environment.</p> <p>Start the WS Admin Console:</p> <ul style="list-style-type: none"> Each Code Drop will consist of 2 sets of files. <ul style="list-style-type: none"> A war file consisting of all the JSP'S, Sevlets, Java Classes and Dependent war files (CMSE47_08272005_RELEASE21_DYNAMIC.war). A zip file consisting of all images ,html pages and style sheets. (CMSE47_08272005_STATIC.zip) Stop the E47 Application. Select the existing E47 application and Click the update link to update the application with the new war file. In the application update window select the CMSE47_08272005_RELEASE21_DYNAMIC.war to be installed. Enter the Application Context Name as /CMSE47 In the next steps Map the Virtual Host and Application Servers to the Application Modules. The last step list the Summary of the changes, confirm the changes by clicking the Finish button. The Application Server will give a message on Build Status and the application will be installed under <WASInstallDir>WebSphere\AppServer\InstalledApps\<AppServerName>\<ModuleName>.ear>. Extract the contents of CMSE47_08272005_STATIC.zip.zip file (Bundled with the code drop) in the CMSE47 Directory. Note : Extract the files on both the Web servers. Implement the Application Configuration changes listed in step 2. Restart the application and make sure you get the successful restart message. Logon to the application and test if both the Application servers are running. 	

IR	Description	Special Instructions
2	<p>Application Configuration Changes</p> <p>Go the application install directory on CMSAPP02 Machine <WASInstallDir>WebSphere\AppServer\InstalledApps\<AppServerName>\<ModuleName.ear> CMSE47_08272005_RELEASE21_DYNAMIC.war</p> <p>Edit E47Config.properties file to make the following changes</p> <ul style="list-style-type: none"> #Version number for Builds version : Release 21 08/27/2005 CMSAPP02 #BatchReportFlag (0 = false, 1= true) generateReport : 0 <p>Note: This Application Configuration Change should be made only to CMSAPP02 Server</p>	
Test the Application		
1	<p>Bring up Web Browser:</p> <p>If Security is not on type the following url: http://<ip address of websphere box>/<context root name>/login.jsp for ex: http://cms.cahwnet.gov/CMSE47/login.jsp</p> <p>IF security is ON type the following url: https://cms.cahwnet.gov/CMSE47/login.jsp</p>	
2	<p>The application login page should now appear.</p> 	

IR	Description	Special Instructions
3.	<p>Enter access code manish11. (The access code is not case sensitive) The use should be taken to the Welcome screen.</p> 	
S. No	Special Instructions: Cache	

ADDENDUM:

Queries for IR 342:

Insert into E47.ServiceGroupCode(ServiceGroupCd,ServiceGroupDesc,ServiceGroupInd)
values('09','CHRONIC DIALYSIS CLINIC', 'MED')

insert into E47.SGToProvType(ProviderType,ServiceGroupCd) values('015','09')

insert into E47.SGToProvType(ProviderType,ServiceGroupCd) values('061','09')

insert into E47.SGToProvType(ProviderType,ServiceGroupCd) values('042','09')

insert into E47.SGToProvType(ProviderType,ServiceGroupCd) values('042','01')
